Ravi Ramakrishnan Athmanathan

🞙 Pleasanton, CA | 🖂 rathmanathan@outlook.com | 🛅 ravirathmanathan

Profile

Seasoned Principal Production Engineer with over 18 years of experience driving the reliability and performance of mission-critical applications, including nearly a decade at Yahoo architecting and managing their Ad Serving and Supply-Side AdTech Services on AWS. Expertise in automating infrastructure management for both on-prem and cloud environments. Certified Kubernetes Administrator (CKA) and Terraform Associate, skilled in building scalable, resilient, and highly available systems using infrastructure as code.

A collaborative leader known for fostering a culture of technical excellence. Seeking to leverage my expertise to lead and mentor high-performing engineering teams in dynamic, cloud-native environments.

Core Competencies

Site Reliability Engineering | GitOps | Containerization & Orchestration | Infrastructure as Code AWS Cloud Services (ECS, EKS) | CI/CD Pipeline Implementation | Technical Leadership | Cross-Functional Collaboration | Incident Management & Resolution | Stakeholder Management | Operational Efficiency & Automation | Process Improvement | Root Cause Analysis | Monitoring & Alerting | SOX | PCI | TLS Certificate Management | X.509 Certificate Management | Secrets Management

System Expertise & Technical Tools

Cloud & Containerization: AWS (EC2, S3, ECS, EKS, VPC, CloudWatch), Kubernetes, Docker, OpenStack

Infrastructure & Automation: Terraform, AWS CloudFormation, Ansible, Automated Infrastructure Management

Programming & Scripting: Python, Java, Shell Scripting, JavaScript

DevOps & Monitoring Tools: New Relic, Splunk, Prometheus, Git, Jira, Screwdriver, GitHub Actions

Web Technologies & Databases: Apache, Nginx, Apache Traffic Server (ATS), NodeJS, ReactJS, CSS, TCP/IP, Load Balancing, CDN, Oracle, MySQL, MongoDB

Experience

1 month Santa Clara, CA

Apr 2025 – present Palo Alto Networks Senior Staff Site Reliability Engineer

- · Contributed to the success of Site Reliability Engineering (SRE) and DevOps practices within the App Services team.
- · Focused on ensuring applications are production-ready, scalable, and reliable by supporting automation, architecture, and observability efforts.
- Actively involved in operating and maintaining secure cloud infrastructure, primarily on GCP.
- Spearheaded team efforts in leveraging AI-powered tools by utilizing Sourcegraph Cody's Agentic workflow and integrating Model Context Protocol (MCP) servers to automate repetitive Infrastructure as Code (IaC) configuration changes through an agentic workflow connecting Sourcegraph Cody, Jira, and GitLab.
- · Engaged in enhancing and maintaining CI/CD pipelines, incorporating GitOps principles to automate service deployment.

- Contributed to security-focused initiatives, including projects such as implementing Workload Identity Federation between GitLab and GCP.
- Collaborated with developers and other technical teams to support and enhance application services.
- Participated in monitoring, troubleshooting, and resolving issues within complex distributed systems.

May 2024 – Sep 2024

5 months **Principal Production Engineer**

- Mountain View, CA Directed the design, deployment, and management of large-scale production environments for Yahoo's Ad Gateway Services on EKS Clusters, ensuring system stability and high scalability to support 2 billion transactions per day.
 - Spearheaded infrastructure automation initiatives, resulting in a 50% reduction in operational overhead and enhanced team efficiency.
 - · Collaborated with Engineering and Product teams to implement best practices, improving system reliability by 5% and performance by 10%.
 - · Mentored and guided engineering teams, aligning individual efforts with overarching company objectives and fostering a culture of technical excellence.

Apr 2019 – Apr 2024

Yahoo

Yahoo

5 years 1 month Mountain View, CA

Senior Production Engineer

- · Deployed and managed containerized applications on Amazon Web Services (AWS) for Yahoo's Supply-Side AdTech Services, emphasizing scalability and high availability to support millions of transactions per day.
- Led critical migration and automation projects leveraging Kubernetes and Terraform
- Conducted proactive capacity planning and performance tuning, ensuring 99.99% high availability and minimizing downtime to less than 5 minutes per month.
- · Expertly resolved complex system-wide issues, providing mentorship and technical guidance to junior engineers in implementing best practices in production engineering.

Nov 2016 – Mar 2019 2 years 5 months Mountain View, CA

Yahoo

Production Engineer II

- · Managed capacity planning and performance tuning for large-scale, high-throughput systems, optimizing resource utilization and system performance.
- Played a pivotal role in the automation of the CI/CD pipeline, reducing manual interventions by 50% and accelerating software delivery cycles.
- Led troubleshooting and root cause analysis for critical incidents, particularly within Linux environments and cloud infrastructure, ensuring rapid resolution and minimizing service impact.

Dec 2015 - Oct 2016 Yahoo

11 months **Lead Operations Engineer**

- Mountain View, CA Coordinated and streamlined the identification and resolution of high-priority incidents, achieving a 25% reduction in service disruptions and maintaining critical system robustness.
 - · Proactively utilized monitoring tools to identify and address potential system issues, reducing the occurrence of critical incidents.
 - Collaborated effectively with cross-functional engineering and operations teams to optimize the performance and reliability of web applications and backend services.

Nov 2014 – Nov 2015

TIBCO Software Inc

1 year 1 month Palo Alto, CA

Senior Support Engineer

Served as the primary point of contact for customers of TIBCO ActiveMatrix, expertly troubleshooting integration issues and ensuring their success.

Sep 2010 – Nov 2014 Infosys Limited

Sunnyvale, CA For Apple Inc., maintained high availability and optimized performance of production appli-

cations through root cause analysis, change management, automation, and expert technical

support.

June 2007 – Sep 2010 Protechsoft Systems Limited

3 years 4 months Software Engineer

Chennai, India Engineered responsive Single Page Applications using JavaScript, HTML, and CSS, enhancing

user workflows and proactively improving UI/UX

Education

June 2002 – May 2007 University of Madras, M.Sc. in Computer Science & Technology – Chennai, India

Certifications

Dec 2024 Certified Kubernetes Administrator (CKA)

Aug 2024 <u>HashiCorp Certified: Terraform Associate (003)</u>
